Professional Summary

Full-Stack Software Engineer and Founding Engineer with experience building and operating production applications across web, mobile, and backend systems. Strong expertise in backend architecture, real-time data processing, database engineering, and cloud infrastructure, with hands-on experience developing AI-powered products and mobile applications. Experienced in end-to-end product development, production troubleshooting, and system optimization.

Experience

Founding Engineer Mar 2025 – Present
Ezwiiz Frontier Systems *India / Remote*

- Architected and independently developed a real-time employee geolocation tracking system using React Native, MQTT, Redis/BullMQ, PostgreSQL, and TimescaleDB, processing **5M+ GPS records** and powering live tracking, route analytics, movement timelines, and Excel-based reports across a platform with **90 registered businesses**.
- Built offline-first GPS tracking in React Native CLI with local location persistence, GPS jitter filtering, and automatic synchronization upon network recovery.
- Designed asynchronous location ingestion and batching pipelines to reduce database write pressure, separating time-series GPS data from core business data for efficient storage and retrieval.
- Resolved recurring AWS RDS PostgreSQL production outages by implementing **PgBouncer connection pooling**, optimizing database resources, and managing backups, recovery, and Prisma schema migrations.
- Integrated **Cashfree Payouts** for individual and bulk salary disbursements, implementing webhook and polling-based payment reconciliation, alongside embedded payment and partner onboarding workflows.
- Developed HRMS modules covering attendance management, configurable shifts, overtime policies, recruitment, employee onboarding, KYC verification, and granular role-based access control.
- Owned production infrastructure and release engineering, developing CI/CD pipelines and managing deployments, versioning, and production troubleshooting; oversaw **workflow executions**. Coordinated a three-member engineering team and supported QA onboarding.

Projects

ChewMate | *React Native, Expo, Bun, Hono, MongoDB, Better Auth, Vercel AI SDK, OpenRouter* Side Project

- Building an AI-powered nutrition tracking app that analyzes food images and text descriptions using vision-capable LLMs to generate structured calorie and nutrient estimates.
- Integrated Vercel AI SDK with OpenRouter for AI-powered food analysis, editable nutritional breakdowns, food logging, hydration tracking, and personalized weight progress.

PakshAI | *Bun, TypeScript, WebSockets, AssemblyAI, Vercel AI SDK, OpenRouter, Next.js* Live

- Developed a real-time AI interview assistant that captures browser-tab audio, transcribes conversations using AssemblyAI, and generates contextual LLM responses.
- Implemented WebSocket-based communication and streaming AI responses, deploying the frontend on Vercel and backend on Railway.

DishaDhan | *TypeScript, Playwright, Custom Quotex SDK, PostgreSQL, AI/ML Integration* Side Project

- Developed a custom TypeScript SDK from scratch to retrieve market data, trading results, available assets, and payout information from Quotex.
- Built an automated trading engine that consumes model-generated buy/sell/hold signals, executes trades through Playwright-based browser automation, and logs trade results in PostgreSQL for historical analysis and model training.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, Rust
Frontend & Mobile: React.js, Next.js, React Native, Expo, Tailwind CSS
Backend: Node.js, Bun, Express.js, Hono, REST APIs, WebSockets, MQTT
Databases & Caching: PostgreSQL, MongoDB, TimescaleDB, Redis, Prisma, Mongoose
AI & Integrations: Vercel AI SDK, OpenRouter, LLM APIs, AssemblyAI
Infrastructure & Tools: AWS, Docker, K8s, Linux, Git, GitHub Actions, CI/CD, Nginx, Playwright
Concepts: System Design, Event-Driven Architecture, Real-Time Systems, Asynchronous Processing, Web3

Education & Professional Training

Bachelor of Science Aug 2022 – Jul 2025
Sri Guru Ram Rai University, Dehradun

100xDevs Cohort 3.0 2024 – 2025
Complete Web Development + DevOps + Blockchain Cohort *Certified*

100xSchool 2026
Combined Bootcamp *Certified*
